PROFESSIONAL SUMMARY

UI/UX and Product Designer with 1.5 years at Dyashin Technosoft, designing enterprise SaaS and web platforms. Translates complex business requirements into clear user flows, information architecture and role-based experiences, and builds reusable Figma components for developer handoff. Project experience spans healthcare, EdTech, recruitment and CRM, with a focus on dashboards, data-heavy tables and multi-step workflows.

SKILLS

UX and Interaction Design: User Flows, Information Architecture, Wireframing, Interaction Design, Rapid Prototyping, Usability Heuristics & Audits, Responsive UX

Product Design: End-to-End Product Workflows, Requirements Translation, Healthcare, SaaS, EdTech and Recruitment Products, Cross-Functional Collaboration

UI Design and Design Systems: High-Fidelity UI, Typography, Data Visualization, Figma Components, Component Architecture, Design Tokens, Reusable Interaction Patterns

Enterprise UX: Role-Based UX and Navigation, Dashboard Design, Complex Forms & Tables, High-Density Interfaces, Multi-Step Workflows, Developer Handoff

Tools and Methods: Figma, FigJam | Wireframing, Rapid Prototyping, Usability Audits

PROFESSIONAL EXPERIENCE

UI/UX Designer | Dyashin Technosoft Pvt. Ltd., India **Sep 2025 – Aug 2026**

- Translated complex business logic and stakeholder requirements into user flows, information architecture and end-to-end workflows for enterprise SaaS and web platforms.
- Designed role-based views and navigation matched to different user goals and permissions.
- Built and maintained modular Figma component libraries and reusable interaction patterns to keep design consistent across development teams.
- Partnered with product managers and engineering leads to take designs from wireframes to developer-ready specifications.

UI/UX Design Intern | Dyashin Technosoft Pvt. Ltd., India **Feb 2025 – Sep 2025**

- Identified usability bottlenecks across enterprise products and restructured legacy screens into clearer, more intuitive interfaces.
- Designed multi-step data entry forms and analytical dashboards for high-density workflows.

PROJECTS

MediTrack — Healthcare and Pharmacy Management Platform

Multi-role platform for pharmacy operations, inventory visibility, and stock management.

- Designed role-specific workflows for Admin, Pharmacist, and Sales Incharge users to support their distinct operational needs.
- Designed high-density inventory tables that surface expiry alerts, low-stock status, and expired-stock information for efficient inventory monitoring.
- Designed multi-branch medicine search and stock-transfer workflows to help pharmacists locate unavailable medicines and initiate transfers between branches.

DSEdify — Learning Management Platform

Learning platform supporting Students, Trainers, Admins, and Moderators throughout the learning lifecycle.

- Mapped role-specific user journeys and access privileges to support different responsibilities across the platform.
- Designed assessment tools for trainers and responsive test-taking interfaces for students, considering the needs of both content management and assessment participation.
- Structured role-based learning experiences to support distinct user tasks across the learning lifecycle.

DSJobby — Recruitment and Campus Placement Platform

Recruitment platform connecting candidates and recruiters for campus placement.

- Designed candidate and recruiter journeys, from profile building to recruitment activities, to support the needs of both user groups.
- Designed an interactive hiring pipeline representing candidate progression through screening, interviews, and offer stages.
- Focused on organizing recruitment information and workflows to make candidate status and hiring-stage progression easier to understand.

Enterprise CRM

CRM platform supporting sales teams managing leads across multiple service lines and nested client requirements.

- Designed lead-tracking workflows for multiple service lines and complex client requirements.
- Designed scalable data tables with configurable column visibility to accommodate different information needs and support efficient lead management.

EDUCATION

Bachelor of Engineering (B.E.), Artificial Intelligence and Data Science — 7.97 CGPA

Maharaja Institute of Technology, Thandavapura | 2025

Pre-University Course (PCMB) — 71.83%

Sri Jayachamarajendra PU College, Mysuru | 2021

Secondary School Leaving Certificate (SSLC) — 68.82%

Dayananda Arya Vidya Public School, Mysuru | 2019
